Parent-Child Home Reading Workshop

E/IC/SC/17/132
23rd March, 2018

Dear Parents,

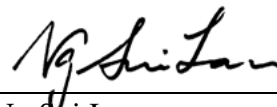

The more parents read with children, the more they will love reading and the more their life experiences will be enriched. Read aloud provides exposure to written language. Ample research shows reading helps children increase their thinking abilities, imagination and creativity. As students move from, “learning to read,” to “reading to learn,” reading helps them to become independent life-long learners. Through sharing feelings and insights, communication with your child is enhanced. Our school would therefore like to foster your child’s reading interest through a Parent-child Reading Program.

We have invited Dr. Hui Sau Yan to our school to conduct a workshop on strategies and techniques you can use reading with your children. There will be a Q and A session to further assist you.
